

RETAIL SALES EXCELLENCE PROGRAM

Turning Store Teams Into Revenue Engines

A structured training, coaching & measurement system — built for fine jewelry retail

₹95Bn→₹154Bn

India jewelry market, 2025→2033

<10%

of frontline staff formally trained

+11.5%

weekend ROI in our own case study

JEWELRY FLOORS ARE LOSING REVENUE TO INCONSISTENCY

High-value, low-frequency purchases live or die on the confidence of the person across the counter.

20–30%

CONVERSION CEILING

Even strong stores plateau at 20-30% conversion in high-traffic categories without structured coaching.

150%

COST PER EXIT

Each departing sales associate costs ~150% of salary to replace — and takes product knowledge with them.

<10%

FORMALLY TRAINED

Less than 10% of the gems & jewelry workforce has formal training — most learn purely on the job (GJEPC).

INDIA'S JEWELRY RETAIL BOOM — OUTPACING ITS TRAINED TALENT

The market is scaling faster than the workforce that sells it.

INDIA JEWELRY MARKET SIZE (USD BN)

ORGANIZED RETAIL SHARE OF MARKET (%)

<10%

FORMALLY TRAINED

Over half the workforce is semi-skilled, trained purely on the job.

Every new store, counter, and category launch is adding sales headcount faster than the industry can train it — the gap compounds every quarter the program is delayed.

Sources: IMARC Group, Grand View Research (India jewelry market sizing); GJEPC workforce skilling data.

INTRODUCING THE RETAIL SALES EXCELLENCE PROGRAM

A structured, floor-first coaching system that turns every store associate into a confident, consistent seller — from first greeting to closed sale.

CORE FOCUS

Store staff training & coaching

Selling skills, technical product mastery (earth-mined & lab-grown diamonds, IGI certification), and on-floor coaching — delivered by category experts, reinforced weekly by store managers.

HOW IT WORKS

A three-phase cycle, repeated every quarter to keep skills sharp as ranges and trends evolve.

INSIDE THE TRAINING DAY: 60% TECHNICAL, 40% SALES

One full day, max 30 associates per batch — split deliberately so product credibility and closing skill grow together.

■ Technical Mastery (4Cs & Certification) ■ Sales & Role-Play

60% • TECHNICAL MASTERY (4Cs)

Cut, Color, Clarity, Carat · IGI grading & certification literacy · Earth-mined vs. lab-grown identification · Jewelry settings.

40% • SALES & ROLE-PLAY

Live objection-handling drills · Consultative selling & needs discovery · Cross-sell / upsell scripting · Closing techniques, peer-observed and scored.

Proof It Works

+11.5%

WEEKEND ROI INCREASE

Achieved for a leading jewelry retail brand in the first full weekend cycle following program rollout.

- Same store footprint, same footfall — the lift came entirely from floor execution
- Weekends selected because they carry the highest walk-ins and highest-value baskets
- Full case study and methodology available on request

WEEKEND REVENUE INDEX

ROI FOR RETAILERS

The economics are proven across retail — and the case study above shows them in a real jewelry floor.

24%

HIGHER PROFIT MARGINS

For organizations that actively measure training ROI vs. those that don't.

4-8 pts

WIN-RATE IMPROVEMENT

Typical conversion-rate lift from targeted, role-specific sales training.

30-50%

LOWER STAFF TURNOVER

Effective training and coaching materially improve associate retention.

90-120 days

TO CONFIRMED ROI

Leading indicators in 30-60 days; full ROI confirms by 90-120 days.

ILLUSTRATIVE 90-DAY IMPACT ON A ₹2 CRORE / MONTH STORE (₹ LAKH)

Illustrative only — actual figures replace these once your Diagnose-phase baseline is set.
