MANAGER DASHBOARD
WITH REAL-TIME DELTA

Following our discussion on Indriya's requirement, IGI is pleased to present a Retail Training Program (RTT) for Indriya's store sales associates, structured as two independent, single-day modules — Module 1 on Diamonds, Module 2 on Colored Stones — each built as 60% technical knowledge and 40% applied selling skill. Because diamond and colored stone counters are often staffed by different associates, the two modules are scheduled and billed independently, so Indriya can send the same associates to both or assign each module to the relevant counter team. Every batch includes pre- and post-training assessment, an IGI Retail Sales Excellence Certificate on completion, and a live dashboard where the score delta appears the moment a batch is scored.

ABOUT IGI

International Gemological Institute (IGI), established in 1975, is a global leader in independent diamond, colored stone, and jewelry grading and certification, operating across 20+ countries with over 30 years of presence in India. Through the IGI School of Gemology, IGI trains over 10,000 students annually across full-time diplomas, the UK Gem-A certification pathway, short programs, and on-site retail training — making IGI both the certifying authority and the training partner trusted across India's diamond and jewelry trade.

PROPOSAL OVERVIEW

This proposal is scoped specifically to Indriya's stated requirement: Diamond and Colored Stone technical & sales training for store sales associates, delivered as **two independent, single-day modules** — 60% technical + 40% sales in each — with a pre-training test, a post-training test, and the score delta computed and displayed live on a manager dashboard the moment each batch is scored. Because the associates who staff Indriya's diamond and colored stone counters may not be the same people, Module 1 and Module 2 are scheduled and priced independently: Indriya can enrol associates in one module, both, or a mix by store and counter. Every associate who clears the threshold is awarded an IGI Retail Sales Excellence Certificate for that module. As Indriya expands its store footprint at pace to compete with established heritage jewellery brands, consistent, certifiable floor knowledge across every new store becomes a direct lever on conversion and trust.

PROGRAM SUMMARY

MODULE	DURATION	SPLIT	BATCH SIZE	FEE
Module 1 — Diamond + Sales Diamond Retail Technical Training	1 Day	60% Technical + 40% Sales	Up to 30 / batch	Rs. 1,500 / participant
Module 2 — Colored Stone + Sales Colored Stone Retail Technical Training	1 Day	60% Technical + 40% Sales	Up to 30 / batch	Rs. 1,500 / participant

All fees exclusive of GST (18%), billed independently per module. Scoped for an estimated 100–150 Indriya sales associates per module across multiple cities/stores (approx. 4–5 batches of up to 30 each) — associates may attend one module or both, depending on counter assignment. Full curriculum, assessment structure, certification, live dashboard, and ROI follow on the pages ahead.

WHY TWO INDEPENDENT MODULES

Indriya's counters sell across both diamond and colored stone jewellery — bridal solitaires alongside ruby, emerald and sapphire pieces for festive and occasion buying — but the associates staffing each counter are not always the same people. Structuring Diamond and Colored Stone as two independent, single-day modules lets Indriya train each counter team on exactly what they sell, without forcing every associate through content for a category they don't handle — while still giving the option to run both modules for the same cohort where associates cover both counters.

THE IGI ADVANTAGE

1975

FOUNDING YEAR

Five decades as a global independent grading & certification authority.

20+

COUNTRIES

Grading and certification footprint spanning every major diamond and jewelry market.

10,000+

TRAINED ANNUALLY

Across full-time diplomas, Gem-A, short programs, and on-site retail training like this one.

30+ Yrs

PRESENCE IN INDIA

A pan-India instructor network built to deliver multi-city rollouts like Indriya's.

ENGAGEMENT AT A GLANCE

STEP 01

Confirm & Schedule

Headcount, city/store list and batch dates locked with Indriya's L&D team, min. 2 weeks ahead of the first batch.

STEP 02

Deliver Batches

IGI instructors run Module 1 (Diamond) and Module 2 (Colored Stone) as independent single-day batches, pre-test to post-test, up to 30 associates at a time.

STEP 03

Certify & Track

Retail Sales Excellence Certificates issued; live delta and certification status visible to managers throughout.

Objective: Equip Indriya's sales associates with practical, floor-ready diamond knowledge and the selling technique to convert it — including confidently handling the natural-versus-lab-grown price conversation that shapes most diamond purchase decisions today.

DURATION	FORMAT	BATCH SIZE	SPLIT	FEE
1 Day (6 hrs)	Instructor-led, classroom + sample stone demonstration	Up to 30 participants	60% Technical + 40% Sales	Rs. 1,500 / participant

Independent module — associates can attend Module 1 alone, or alongside Module 2 (Colored Stone), depending on their counter assignment.

MORNING — TECHNICAL (60%)

- Natural Diamond 4Cs — practical, floor-usable grading logic
- Natural vs. Lab-Grown Diamond — value gap, rarity and resale narrative for the LGD price objection
- Diamond shapes, cuts & fluorescence — what drives visible beauty vs. paper specs
- Treatments & disclosure — clarity enhancement, HPHT, disclosure norms
- IGI diamond certification literacy — reading a report as a trust tool

AFTERNOON — SALES (40%)

- Consultative selling for diamond purchases — solitaire, bridal sets, occasion buying
- Handling the "why natural over lab-grown" objection
- Reading buying signals; ethical upselling (carat / clarity / color upgrade, set completion)
- Cross-sell into the Colored Stone range, for associates also attending Module 2
- Closing technique — using the IGI certificate as a closing tool

II

As Indriya opens new stores at pace to build a national footprint against long-established players, the associates who can hold the natural-vs-lab-grown value conversation with confidence — on day one of a new store's life — protect both margin and the trust Indriya is trying to build fast.

LEARNING OUTCOMES — WHAT ASSOCIATES WALK AWAY WITH

Identify

TECHNICAL

Grade natural diamonds on the floor using the 4Cs, confidently and correctly.

Explain

VALUE NARRATIVE

Articulate the natural-vs-lab-grown value gap without hesitation or defensiveness.

Handle

OBJECTIONS

Turn price objections into upsell conversations instead of reflexive discounting.

Close

CONVERSION

Use the IGI certificate as a trust-building tool at the moment of closing.

OBJECTION HANDLING IN PRACTICE

CUSTOMER SAYS	HOW A TRAINED ASSOCIATE RESPONDS
"Why is this so expensive when lab-grown is half the price?"	Reframes around rarity, resale value and the natural-origin story — not a discount conversation.
"How do I know this is really natural?"	Uses the IGI certificate as physical proof, walking the customer through how to read the report.
"Can you do a better price?"	Shifts to value-add — carat, clarity or color upgrade, set completion — before ever discounting.

Objective: Build the same floor-ready confidence for Indriya's colored stone counter — ruby, emerald and sapphire — where treatment disclosure and natural-vs-synthetic questions are just as central to the sale as they are for diamond.

DURATION	FORMAT	BATCH SIZE	SPLIT	FEE
1 Day (6 hrs)	Instructor-led, classroom + sample stone demonstration	Up to 30 participants	60% Technical + 40% Sales	Rs. 1,500 / participant

Independent module — associates can attend Module 2 alone, or alongside Module 1 (Diamond), depending on their counter assignment. The batch may be the same associates as Module 1, or a different group entirely.

MORNING — TECHNICAL (60%)

- Colored stone essentials — ruby, emerald, sapphire: what drives value (color, clarity, cut, carat)
- Natural vs. treated vs. synthetic colored stone — the disclosure conversation, in plain floor language
- Common treatments — heat treatment (ruby/sapphire), oiling & resin (emerald) — and how to disclose them
- Origin & rarity narrative — what makes a colored stone piece special to a customer
- IGI colored stone certification literacy — reading a report as a trust tool

AFTERNOON — SALES (40%)

- Consultative selling for colored stone jewellery — festive, bridal and gifting occasions
- Handling the "is this natural / is this treated" objection with confidence, not defensiveness
- Cross-sell & set-completion — pairing colored stone pieces with Diamond training, for associates who've also attended Module 1
- Reading buying signals; ethical upselling on stone size, quality and setting
- Closing technique — using the IGI certificate as a closing tool

II

Colored stone purchases carry more emotion and more uncertainty than diamond — customers ask "is this real" more often, and more nervously. An associate who can answer that calmly, backed by an IGI report, converts a hesitant browser into a confident buyer.

LEARNING OUTCOMES — WHAT ASSOCIATES WALK AWAY WITH

Identify

TECHNICAL

Recognize ruby, emerald and sapphire quality drivers, confidently and correctly.

Disclose

TREATMENTS

Explain heat treatment, oiling and resin plainly — disclosure as a trust-builder, not a weakness.

Handle

OBJECTIONS

Answer "is this real / is this treated" with calm confidence, not defensiveness.

Close

CONVERSION

Use the IGI certificate as a trust-building tool at the moment of closing.

OBJECTION HANDLING IN PRACTICE

CUSTOMER SAYS	HOW A TRAINED ASSOCIATE RESPONDS
"Is this ruby / emerald natural or treated?"	Explains the treatment plainly and shows the IGI report — disclosure builds trust rather than undermining it.
"Why does this emerald have so many inclusions?"	Reframes inclusions as a natural-origin signature ("jardin"), not a flaw — part of what makes it genuine.
"Is this stone synthetic?"	Explains the natural-vs-synthetic distinction with confidence, backed by the IGI certificate.

PRE-TRAINING & POST-TRAINING ASSESSMENT

Every associate is tested before and after each module, so improvement is measured — not assumed — and the delta is visible live, not weeks later in a static report.

STAGE	TIMING	DETAIL
Pre-Training Test	15 min, at the start of each module	15–20 MCQs covering that module's technical basics (Diamond in Module 1, Colored Stone in Module 2); establishes a per-associate, per-batch baseline. Not scored for certification.
Post-Training Test	25 min, at the close of each module	20–25 MCQs, ~60% pass threshold for certification eligibility on that module.
Live Delta	Instant — on the dashboard	The pre-vs-post score comparison computes automatically the moment a post-test is scored, and appears live on the manager dashboard — per associate and rolled up per batch. No separate report, no waiting.

RETAIL SALES EXCELLENCE CERTIFICATE

Every sales associate who completes a module and clears its post-test pass threshold is awarded an **IGI Retail Sales Excellence Certificate** for that module — Diamond or Colored Stone — recognizing competency in both technical knowledge and consultative selling skill for that category. Associates who complete both modules receive a combined Diamond + Colored Stone endorsement on their certificate record. Issued per associate, with issuance status tracked live on the dashboard.

Per-Module

CERTIFICATE SCOPE

Issued separately for Diamond and Colored Stone; both-module associates get a combined endorsement.

~60%

PASS THRESHOLD

Applied per module on the post-training test, for certification eligibility.

IGI

ISSUING AUTHORITY

Certificate carries IGI's name — a customer-facing trust signal on the Indriya floor.

Associates who do not clear the threshold on a module may be offered a re-test window, to be mutually agreed with Indriya's L&D team.

CERTIFICATION GRADING BANDS

SCORE BAND	OUTCOME	WHAT IT MEANS ON THE FLOOR
85–100%	Excellence	Top-band certification; eligible for recognition as a store "Certified Expert" associate.
70–84%	Proficient	Certified and floor-ready — solid command of both technical and sales content.
60–69%	Pass	Certified, meeting the minimum bar for the Retail Sales Excellence Certificate.
Below 60%	Re-test	Certificate withheld pending a re-test window, agreed with Indriya's L&D team.

ON THE CERTIFICATE

Each Retail Sales Excellence Certificate carries the associate's name, store/city, the module (Diamond or Colored Stone) and programme date, that module's score band, and an IGI certificate number that can be verified against the live dashboard — giving Indriya's management (and, where relevant, the associate) a verifiable credential rather than a paper-only certificate. Where an associate holds certificates for both modules, the dashboard displays the combined record.

Every batch's pre-test, post-test, score delta and certification status feeds a live dashboard — built on IGI's existing Assessment & Reporting Platform — so Indriya's store and regional managers see training progress, and the delta, as it happens.

WHAT MANAGERS SEE

- Store-wise and region-wise roll-up of associates trained vs. total headcount, tracked separately for Module 1 and Module 2 since attendee lists may differ
- **Live delta chart** — average pre-to-post score by module and by store, visible the moment a batch is scored
- Certification status by associate and by module — issued, pending re-test, or combined-endorsement — exportable for HR and store audit records
- Access shared with designated Indriya L&D and regional managers; refreshes automatically after each batch's assessment is scored

Dashboard is delivered as a shared, web-accessible view (desktop and mobile) for the duration of the training engagement. Exact hosting and access details to be finalized with Indriya's IT/L&D team during onboarding.

Fine jewelry is a high-value, low-frequency purchase that lives or dies on the confidence of the person across the counter. As Indriya scales its store network fast, training consistency becomes a direct P&L lever, not a soft HR initiative.

+11.1%

POST-TRAINING REVENUE INDEX INCREASE

Achieved for a leading jewelry retail brand in the first full cycle following a comparable IGI training rollout – same store footprint, same footfall; the lift came entirely from floor execution.

20–30%

CONVERSION CEILING

Even strong stores plateau at 20–30% conversion without structured coaching.

4–8 pts

WIN-RATE IMPROVEMENT

Typical conversion-rate lift from targeted, role-specific sales training.

30–50%

LOWER STAFF TURNOVER

Certified, confident associates are demonstrably less likely to exit.

24%

HIGHER PROFIT MARGINS

For organizations that actively measure training ROI vs. those that don't.

WHY THIS MATTERS SPECIFICALLY FOR INDRIYA

- **New-store readiness:** every new Indriya store opens with a floor team that is certified and objection-ready from day one, rather than learning on live customers.
- **Margin protection on naturals:** associates who can counter the lab-grown price objection reduce reflexive discounting to close a sale.
- **Higher average order value** via trained upselling and cross-sell between diamond and colored stone counters.
- **IGI-certified staff as a trust signal** – directly useful for a brand still building trust against long-established competitors.

ILLUSTRATIVE 90-DAY IMPACT

On a Rs. 2 crore/month store (Rs. lakh)

Illustrative only – actual conversion and revenue figures should be benchmarked against Indriya's own store baselines once the pre-test phase is complete. Source: aggregated sales & retail-training ROI industry research, 2026; GJEPC workforce skilling data.

RECOMMENDED DELIVERY FORMAT

IGI recommends **physical, in-store or hub-location training** for both modules. Diamond and colored stone selling is a tactile, sample-in-hand skill — associates need to physically handle stones under a loupe, run live role-play objection drills, and get real-time correction, none of which transfers fully to a screen. In-person delivery also drives materially higher pre-to-post score deltas and completion rates.

Where a physical batch is genuinely not feasible for a given city/cluster (e.g. very low associate density, urgent onboarding timelines), IGI can deliver the same curriculum as a live, instructor-led **online session** as a fallback — with the technical demonstration adapted to video and the sales role-play conducted via breakout rooms. Pre-test, post-test, live delta and certification tracking remain identical in either format.

Physical training — recommended default

Online — fallback for low-density clusters

Same live dashboard, either way

COMMERCIAL TERMS

- All fees quoted are exclusive of GST (18%), applicable extra, and billed independently per module.
- Instructor deployment: 1 IGI specialist instructor per module batch — a Diamond specialist for Module 1, a Colored Stone specialist for Module 2; **airfare, stay (accommodation) and local conveyance for the instructor to be arranged and borne by Indriya** for each batch.
- Venue, participant refreshments, and any printing / stationery to be arranged by Indriya for physical batches.
- Batch cap: 30 participants per batch. Module 1 and Module 2 are scheduled independently — the same or different associates may attend each, based on Indriya's counter staffing.
- Retail Sales Excellence Certificates issued by IGI per module completed, subject to that module's post-test pass threshold; a combined endorsement is shown for associates completing both.
- Live dashboard access, with real-time delta, provided to designated Indriya L&D and regional managers for the engagement duration.
- Dates to be mutually confirmed at least 2 weeks in advance of each batch, to allow for instructor travel.
- Proposal valid for 30 days from date of issue.

NEXT STEPS

- Confirm final associate headcount and number of stores/cities for rollout.
- Confirm training locations and physical vs. online split by cluster.
- Finalize batch dates and dashboard access list for Indriya's L&D team.
- IGI to issue formal confirmation and the instructor deployment plan.
